

2305 SERIES UNIVERSAL COLD AIR RADIANT TUBE BURNER FOR FORCED AIR OPERATION

CAPABILITIES

- Quiet, stable operation
- Uniform tube temperature
- Fits most tube configurations
- For tube diameters from 4" (102 mm) to 8" (203 mm)
- Available in wide capacity range
- Suitable for most gaseous fuels having a heating value of 500 Btu/scf or greater
- Low NO_x air-staging technology
- Low carbon monoxide emissions
- Turndown capabilities to 10 to 1 on ratio
- Excess air capabilities from 10 to 100 percent
- Designed to operate using most control systems
- Suitable for UV flame supervision

FEATURES

- Rugged construction
- Air staged nozzle for low NO_x emissions
- Adjustable flame length
- Direct spark ignition or continuous pilot
- Competitive pricing

APPLICATIONS

- Aluminum Furnaces
- Air Heaters
- Roller Hearth Furnaces
- Salt and Lead Baths
- Continuous, Wire and Batch Annealing Furnaces
- Galvanizing Furnaces
- Enameling Furnaces
- [™]Glass Furnaces
- Many Other Applications

CAUTION: The improper use of combustion equipment can result in a condition hazardous to people and property. Users are urged to comply with National Safety Standards and/or Insurance Underwriters recommendations
