Description

The Dual Modular Valves with Vent Line Adapter (DMV-VLA) combines two safety shutoff valves in one compact housing with a factory installed vent line connection between the two safety valves.

- DMV-D series contain two fast opening and fast closing safety shutoff vavles, and max. flow adjustment to vary the flow.
- DMV-DLE series have an extra feature.
 Valve two is a slow-opening valve.
- DMV valves ending /622, /624L and /612 have proof of closure.
- DMV valves ending in L are rated as NEMA Type 4.
- DMV ZR series valves have two stage operation.

Directly mounting the following accessories creates a compact valve train without additional piping:

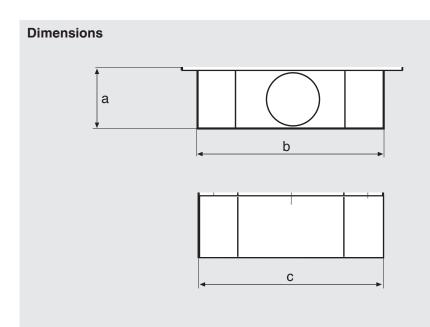

- Pressure regulator
- High and low gas pressure switches
- Valve proving system
- DMK Butterfly control valve

Application

The DMV-VLA is recommended for industrial and commercial heating applications that require two safety shutoff valves with a vent line connection between the safety shutoff valves. The DMV-VLA is suitable for dry natural gas, propane, butane, air and inert gases.

A "dry" gas has a dew point lower than +15 °F and its relative humidity is less than 60 %.

- The DMV 701 with VLA has a 3/4" NPT connection on both sides of the valve.
- The DMV 702/703 with VLA has a 1" NPT connection on both sides of the valve. A 1" to 3/4" reducer is required when a 3/4" vent valve is used.

VLA connection is perpendicular to main gas flow

Vent Line Connection

Certain codes and authorities having jurisdiction specify the size of the vent line based on the main gas line diameter.

Typical requirements are:

- For main gas lines up to 1 1/2"; the vent line must be 3/4" minimum.
- For a 2" main gas line; the vent line must be 1" minimum.
